## EXPERIENCE

### Front End Developer

#### 233Developers Inc (Ghana)

📅 06/2023 - Present 📍 Remote

- Crafted a React web app to facilitate user management and administrative operations for a dating mobile app with over 6000 users, boosting engagement metrics by 40% within the first quarter.
- Integrated a Customer Support feature within the aforementioned web app incorporating real-time messaging capabilities; reduced average users' issue resolution time by a notable 30%.
- Spearheaded the deployment of error handling mechanisms for message transmissions, delivering 99.9% error-free communications by providing immediate visual feedback for any failures.
- Enhanced admin experience by integrating Material UI components to deliver timely notifications for admin actions and API feedback, leading to a remarkable decrease in admin errors and a 10% boost in productivity.
- Engineered an activity timeline feature to track admin actions, encompassing login events, user bans, password changes, and support ticket management activities; facilitated in-depth audit trails for admin operations.
- Implemented React custom hooks to optimize fetch requests within components, resulting in significant reduction of code redundancy, improved maintainability, scalability, and overall code quality.
- Scaled up the application's performance and rendering efficiency by managing global states with React Context API and state management techniques driving a 50% decrease in bug reports and rise in satisfaction ratings.
- Transformed 50+ PSD designs and Figma prototypes into interactive HTML pages, ensuring pixel-perfect accuracy, cross-browser compatibility, and ADA (Americans with Disabilities Act) compliance.
- Led a brainstorming session to kickstart the development of a laundry management system app; crafted an App Concept Proposal document outlining user personas, wireframes, and functionality requirements.

### Software Developer Intern

#### SiNet Technologies (Seconded to Oando PLC)

📅 03/2023 - 05/2023 📍 Victoria Island, Lagos

- Revamped content generation and rendering in a web app with EJS templates, increasing developer productivity by 100% and streamlining client-side data processing.
- Deployed and maintained web servers using Node.js and Express, handling 100+ concurrent users with 0% downtime in high-traffic e-commerce environment.
- Designed a JWT authentication mechanism for applications; reduced unauthorized access attempts by 25% within the 1 month of deployment.
- Simplified database schema for a SaaS platform utilizing MongoDB Aggregation Pipelines, slashing query response time by 50% and upgrading system scalability.
- Created REST-APIs with detailed documentation using Postman and Swagger UI, including role-based access controls and reducing endpoint access errors by 30%.
- Learned to develop Progressive Web Applications (PWAs) within 1 month, demonstrating rapid skill acquisition.
- Collaborated with senior developers and project managers to identify and resolve technical issues within applications.

## SKILLS

React JavaScript (ES6) Next JS

TypeScript Node.js Express

MySQL Serverless (with Netlify)

MongoDB Tailwind CSS3

Styled Components Git GitHub

Gulp HTML5

## PROJECTS

### Kanban Task Manager App

📅 03/2023 - 04/2023

Web Application

- Developed and deployed a full-stack task management app using React, Typescript, Node.js, Express, and MongoDB; streamlined task organization, leading to a 25% decrease in project turnaround time.
- Grew user engagement by 5% through the embedding drag-and-drop functionality for tasks and columns using a custom library.
- Enabled task assignment to team members via email addresses and integrated notifications, improving team communication and ensuring timely updates.
- Bolstered transparency and collaboration by adding real-time task status tracking for team members.

## EDUCATION

### Bachelor of Engineering, Computer Engineering

Federal University of Technology, Akure

📅 01/2018 - 02/2024
